FIGHTING TERRORISM: HOW DEMOCRACIES CAN DEFEAT DOMESTIC AND INTERNATIONAL TERRORISTS BY BENJAMIN NETANYAHU PDF

In this innovative and concise work, Israeli politician Benjamin Netanyahu offers a compelling approach to understanding and fighting the increase in domestic and international terrorism throughout the world. Citing diverse examples from around the globe, Netanyahu demonstrates that domestic terrorist groups are usually no match for an advanced technological society which can successfully roll back terror without any significant curtailment of civil liberties. But Netanyahu sees an even more potent threat from the new international terrorism which is increasingly the product of Islamic militants, who draw their inspiration and directives from Iran and its growing cadre of satellite states. The spread of fundamentalist Islamic terrorism, coupled with the possibility that Iran will acquire nuclear weapons, poses a more frightening threat from an adversary less rational and therefore less controllable than was Soviet Communism. How democracies can defend themselves against this new threat concludes this provocative book.

Profound thoughts on Terrorism

By William C. Hester

Three words come to mind after reading this introduction to the state of modern terrorism: Prescient, Provocative, and Profound.

Even if the reader does not agree with everything in the book, he would in all fairness have to admit that there is nothing confusing, imprecise, or wishy-washy about its contents.

After thoughtfully considering this book's contents, especially in view of recent events, I inescapably arrived at the conclusion that there is no justification whatsoever for terrorism of any sort, that terrorism, at its basic level, merely seeks to take power, however violently or bloodily, from one set of hands and place it in another set of hands (namely and coincidentally, the hands of the terrorists and/or their sponsors). It seems that terrorism, by its very nature, cannot involve any form of honest altruism.

In a certain very real sense, after reading this book, one cannot walk away feeling particularly good; the threat of modern terrorism is frightening and forces one to take a real look at the world he lives in. One feels disturbed at a visceral level, knowing that whoever he is or wherever he lives, he is not immune to the threat of terrorism.

I find myself wishing/wondering what I can personnaly do to help eradicate the cancer of terrorism. I will look further.

Faces the problem head on! Highly recommended.

By M. D Roberts

A first class book befitting the present climate following the September 11th terrorist attacks upon the US and the Palestinian terrorist upsurge against Israeli civilians in the Mid-East.

Most people will be aware of Benjamin Netanyahu's history as a former Prime Minister of Israel, but few are aware of his service as a soldier in an elite anti-terrorist unit in the Israeli army. Netanyahu having considerable experience of fighting terrorism on the diplomatic, political and also military battlefields.

Netanyahu pulls no punches in his direct, vigorous assault upon terrorism. This latest edition being published since the aforementioned terrorist attacks and includes reference and comment in relation to them.

Anti-terrorism measures voiced by Netanyahu are weighed against the question of civil liberties and he also projects his views on the rise of Militant Islam and the nuclear threat provided by terrorist entities.

The author candidly and honestly declares his opinion that, what is at stake today in facing the present upsurge of terrorism and fundamentalism, is nothing less than the survival of our civilisation. He advocates that any such talk in apocalyptic terms which might have been irrelevant exaggeration some ten years ago, is now becoming an accepted fact of life.

Despite such a shocking affirmation, the former Israeli PM expresses confidence that the threat can be successfully tackled if the enormous reserves of power and facilities at the disposal of the West are appropriately and quickly marshalled.

Netanyahu believes that no international terrorism can flourish without the support of sovereign states. He maintains that the latter train, arm and indoctrinate the terrorists within safe havens provided by these regimes, who more often than not share their agendas, dispatching these groups or individuals to serve as their proxies of terror.

The views of the author have been proved true and accurate time and time again as the 'war against terrorism' continues.

One need look no further than Iran, Iraq, Syria, Afghanistan and the Palestinian territories. Fundamentalist Islamic terrorist groups are granted freedom to operate and receive the financial and political support from all these entities. Not to mention Lebanon, Saudi Arabia and Yemen.

Arafat's rule in the Palestinian autonomous areas has seen the freedom and approval for the running of summer camps in Gaza where Palestinian children are openly seen receiving training to become suicide bombers, with undisguised instruction in the merits of martyrdom and the methods of murder. Yet the world looks on with apparent or wilful impotence.

The author proclaims that 'the success of terrorists in one part of the terror network emboldens terrorists throughout the network'. Enough said.

Netanyahu adds that such small groups and individuals '...nullify in large measure the need to have air power or intercontinental missiles as delivery systems for an Islamic nuclear payload, as...they will be the delivery system'.

The world would be foolish to ignore such a warning and its potential consequences, especially with the hindsight of September 11th.

The author asks the question, "...do we rally to defeat this evil, while there is still time, or do we press a collective snooze button and go back to business as usual?"

He continues to assert that, whilst the fight against terrorism might inflict some innocent civilian casualties, this in itself does not constitute a 'terrorism' of its own, as some would argue.

Such casualties, he states, are entirely unintentional, indeed regrettable, but are tragedies by comparison and appropriate measures must be taken to minimise them.

To the contrary, terrorists do not unintentionally harm civilians! They deliberately murder, maim and menace civilians...in fact as many as conceivably possible!

It is Netanyahu's opinion that NOTHING can justify terrorism. No cause, grievance or agenda, irrespective of the opponent, state or race.

He asserts that any cause that uses terrorism to advance its aims must NOT be rewarded, or seen to be rewarded...or accepted.

The recent climate of trying to equate or describe some terrorists as 'freedom fighters' is like a cancer to such commendable anti-terror standards. Those promoting such a questionable policy must have their own agendas closely scrutinised, as they perhaps have a 'goal' of their own.

The author quite rightly affirms that the situation cannot be dismissed that a militant terrorist state could SOON use its 'proxies' to threaten or even launch a nuclear, chemical or biological attacks with apparent impunity.

Nor can the prospect be ignored that a militant regime would commit 'collective suicide' for the sake of a fanatical ideology. Such a scenario would inflict hundreds of thousands, perhaps millions of civilian casualties.

Therefore the author is clear in his stand that EVERYTHING must be done to prevent such regimes (eg.

Iraq, Iran) from developing such weapons or neutralising those already in their possession. Netanyahu suggests that a coalition be built around this very mission.

Although not a large book, (some 150 pages in the paperback version), it packs a considerable punch. Highly recommended read !

Fighting Terrorism: How Democracies Can Defeat Domestic and

By Frequent buyer

An outstanding work by a leader of a nation that knows all too well the horrors of terrorism.

As a democracy - Israel provides more rights to its Arab populace (voting, owning property, freedom to voice differing opinions) than they have in ANY Arab state- Israel faces the same challenges that America now confronts.

Natanyahu's book should serve as a primer to our leaders that only through forcing terrorists and the nations that harbor them to pay an enormous price for foisting terror on noncombatants can we possibly avoid repeating September 11.
