Review

"The use of full colour thought makes it extremely attractive and the quality and quantity of information will make it more than useful for anyone preparing for the MOrth or Master's exams. Once upon a time, there was a book called enquire within on Everything- this handy volume comes very close as regards orthodontics. I look forward to it becoming a standard." Orthodontic Update, July 2010

"A substantial chapter (6) is devoted to describing the procedure for the aquasition of a comprehensive database for the formulation of an appropriate treatment plan. The timing aims and limiting factors of orthodontic treatment are debated in Chapter 7. Shown and described in Chapter 8 are the variety of tooth movements that can be achieved with removable appliances, either individually or on groups of teeth. The authors claim to have attempted to write a book that will appeal to students of orthodontics; I believe this they certainly have achieved. Stressed is the necessity of understanding of the basic sciences which includes a detailed description of craniofacial development, growth and disease." Dr. Alex Jacobson

"Both a textbook and a work of reference, this 400-page paperback is accompanied by a substantial index (over 20 pages). This makes quick referral to any of the subjects included here very straightforward."

About the Author

Martyn Cobourne is Professor of Orthodontics at King's College London and Hon Consultant in Orthodontics at Guy's and St Thomas' NHS Foundation Trust. He graduated as a dental surgeon from King's College School of Medicine and Dentistry in 1990. After a series of junior hospital appointments in

maxillofacial surgery and pediatric dentistry, he obtained a Fellowship in Dental Surgery from the Royal College of Surgeons of England in 1994. A three-year period of specialty training in orthodontics at the King's Dental Institute led to the award of Membership in Orthodontics from the Royal College of Surgeons of England and entry onto the Specialist List in Orthodontics in 1997. He was then awarded a Clinical Training Fellowship from the Medical Research Council in 1998, which allowed a dedicated period of research to take place in Paul Sharpe's laboratory at the United Medical and Dental Schools, Guy's Dental Hospital, working in the field of craniofacial developmental biology. This work culminated in a PhD from the University of London in 2002. A further period of higher clinical training at Guy's Hospital led to an Intercollegiate Specialty Fellowship in Orthodontics and accreditation as a Consultant Orthodontist in 2004. Martyn was appointed as a Senior Lecturer and Honorary Consultant in Orthodontics at the King's College London in 2004 and awarded a personal chair in orthodontics in 2011.

Martyn is Orthodontic Training Programme Director at Guy's and St Thomas' and is an MSc examiner at King's College London. He is Director of Research at the British Orthodontic Society and Editor-in-Chief of the Journal of Orthodontics. He is registered on the Specialist Orthodontic List of the General Dental Council.

Andrew DiBiase is a consultant orthodontist based at East Kent Hospitals University NHS Foundation Trust in Ashford and works in part-time NHS and private practice in Kent. He graduated as a dental surgeon from King's College London School of Medicine and Dentistry in 1990. After a series of junior hospital appointments in maxillofacial surgery, oral pathology, paediatric dentistry and periodontology he obtained a Fellowship in Dental Surgery from the Royal College of Surgeons of England in 1994. A three-year period of specialty training in orthodontics at the Royal London Hospital led to a Membership in Orthodontics from the Royal College of Surgeons of England and entry onto the Specialist List in Orthodontics in 1997. He carried out his higher orthodontic training in Sheffield and Leicester and was awarded the Intercollegiate Specialty Fellowship in Orthodontics in 2000, being appointed Consultant Orthodontist at the Kent and Canterbury Hospital shortly after.

Andrew is involved in the postgraduate training programmes and is an MSc examiner at the Royal London and Guy's Dental Schools. He is active in the British Orthodontic Society and he is registered on the Specialist Orthodontic List of the General Dental Council. He is a provisional member of the Angle Society of Europe.

HANDBOOK OF ORTHODONTICS, 1E BY MARTYN T. COBOURNE BDS(HONS) FDSRCS(ENG) FDSRCS(EDIN) MSC MORTH RCS(ENG) FDSORTH RCS PHD FHEA, AND PDF

Richly illustrated and in full colour throughout, the new HANDBOOK OF ORTHODONTICS presents the subject of orthodontics in an accessible, easy-to-read manner. Whilst maintaining a strong clinical focus throughout, this new volume provides the reader with a firm understanding of the problem of malocclusion and its management and addresses the controversies in modern orthodontics by taking an evidence-based look at current clinical practice. The book also presents a clear explanation of the basic sciences of relevance to the orthodontist, including an up-to-date look at craniofacial development, growth and syndromic conditions that affect this region.

- Offers comprehensive coverage of clinical orthodontics, from diagnosis and treatment planning through contemporary removable and fixed appliances to cleft lip and palate
 - Helps the reader develop a critical approach to the different philosophies of treatment by addressing controversies in orthodontics and looking at current clinical practice in an evidence-based manner
 - Covers the scientific basis of orthodontics in detail with particular focus on embryology, craniofacial development, growth and the biology of tooth movement
 - Numerous clinical examples clearly illustrate the theory described
 - Succinct writing style and rich use of pedagogy - almost 400 illustrations and tables together with 'pull-out boxes' – to help make learning easy
 - Ideal for use as a textbook or as a reference manual
 - Suitable for senior dental students, postgraduate trainees and residents in orthodontics
