IPM IN PRACTICE, SECOND EDITION BY MARY LOUISE FLINT PDF

Principles and Methods of Integrated Pest Management

This manual from the University of California Statewide IPM Program is the most comprehensive, practical field guide ever developed for setting up and carrying out an IPM program in any type of crop or landscape.

IPM in Practice features IPM strategies for weed, insect, pathogen, nematode, and vertebrate pests and provides specific information on how to set up sampling and monitoring programs in the field. This manual covers methods applicable to vegetable, field, and tree crops as well as landscape and urban situations. Designed to bring you the most up-to-date research and expertise, this manual draws on the knowledge of dozens of experts within the University of California, public agencies, and private practice.

What's new in the second edition?

- Newly revised to reflect new developments and technology
- Updated information on policies and regulations
- New information on invasive pests, pesticide resistance, volatile organic compounds, endangered species, and more.
- More than 160 color photos and 100 hand-drawn color illustrations
- Over 35 new photos, figures and tables

This manual is the official study guide for individuals preparing for the California Department of Pesticide Regulation's Pest Control Adviser exam.
